► Product Introduction

New Performance Requirements for True Metal Alloy Zero Ohm Jumper Chip Resistor in High Power Applications.

Features :

- High current application with Low profile.
- Ultra-Low resistance values, 0.2 mΩ Max.
- operating temperature range -55°C ~+150°C.
- Wide range package sizes 1206, 2512, 2817, 2725, and 4527.

Applications :

- Electrical tools, Power Management
- NB, Mobil Device, Server, Portable Devices
- Automotive, Industrial, Consumer Electronics, Electric Instrument

A zero ohm resistor is often called SMD jumper resistors, milli-ohm resistor, or zero ohm link resistors which are designed to link to circuits to together just like any other wire.

DeMint's true metal alloy strip zero ohm resistors (LRJ) make options with a lot less space and cost than DIP switches and jumper headers. These high current metal alloy jumper resistor chips (LRJ) SMT series, designed to replace zero ohm resistors without changing board designs or layouts. The devices could also be applied in high power applications to replace jumper wire for better stability or buried copper coin PCB for cost saving.

Five jumpers for the different resistor chip sizes are provided a wide range of standard dimensions 1206, 2512, 2817, 2725, and 4527 to make ease of designs along with footprint template compatibility. DeMint (LRJ) SMD metal alloy current jumper resistors designed for applications that require high power handling (Up to 5W) with resistance < 0.2mΩ at operating temperature range -55°C ~+150°C. (LRJ). These new products are distinctively suited as true zero ohm resistor replacements.

DeMint (LRJ) resistor chip jumpers manufactured from metal alloy plate and designed to deliver a extremely low impedance and profile circuit linkage as a zero ohm resistor. Chip jumpers are packaged on tape and reel for compatibility with most vacuum or mechanical pick and place assembly systems. These (LRJ) SMD devices are also suitable for high current, high-density PCB packages on power and aluminum backplanes.

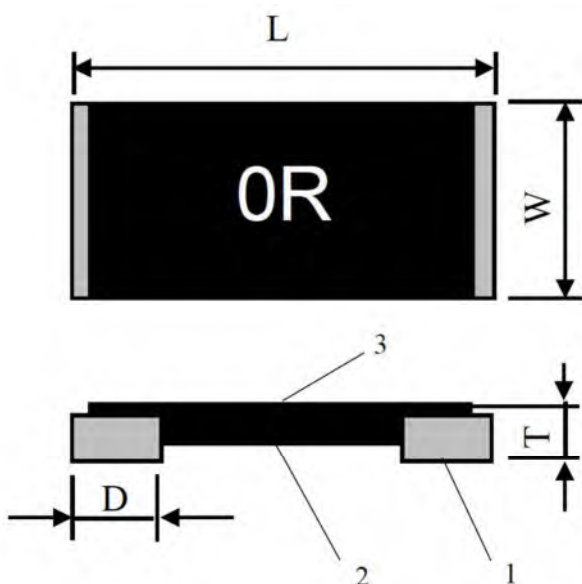

Some circuit boards are designed with multiple functions and configurations in one design. Often these functions and configurations can't coexist in single circuit because they will conflict with each other. To this end, more and more designers use (LRJ) resistor SMD jumpers for single side PCB that has no through-hole but for double-sided PCB. An application is used as a dummy, when through-holes for a not- yet- designed- resistor are prepared by way of precaution, and the holes are short-circuited after all.

DeMint electronics delivers the right chip for your low range, current-sense applications. For more detailed product information and data sheets or to discuss your specific requirements please contact DeMint electronics. Or link to DeMint official website "[Current Sense Resistors](http://www.direct-token.com)".

► Dimensions

Zero Ohm Resistors (LRJ) Construction & Dimensions

Electrical Specifications

Zero Ohm Chip Resistors (LRJ) Electrical Specifications

Type	Power Rating at 70℃	Max. Rating Current (A)*	Resistance (mΩ)	Operating Temperature ℃
LRJ1206	1	70.7	< 0.2	-55~+150℃
LRJ2512	2	100	< 0.2	
LRJ2817	3	122	< 0.2	
LRJ2725	4	140	< 0.2	
LRJ4527	5	158	< 0.2	

- Note: Rating Current $I = \sqrt{P/R}$ or Max. Rating Current whichever is lower.
Special tolerance and range of resistance are under requested.

Land Pattern

Zero Ohm Chips (LRJ) Recommend Land Pattern

Type	Maximum Power Rating (Watts)	Dimensions (Unit: mm)		
		a	b	i
LRJ1206	1	1.00	1.90	1.40
LRJ2512	2	2.11	3.68	3.18
LRJ2817	3	2.45	4.60	3.11
LRJ2725	4	2.34	6.86	3.00
LRJ4527	5	3.40	8.74	6.43

LRJ4527	7.38	12.0	24.0	1.75	11.5	4.0	12.0	2.0	1.55	1.55	1.05

Emboss Plastic Tape Specifications (Unit: mm)

- The cumulative tolerance of 10 sprockets hole pitch is $\pm 0.2\text{mm}$.
- Carrier camber shall be not more than 1mm per 100mm through a length of 250mm.
- A & B measured 0.3mm from the bottom of the packet
- T measured at a point on the inside bottom of the packet to the top surface of the carrier.
- Pocket position relative to sprocket hole is measured as the true position of the pocket and not the pocket hole.

Packaging Quantity (LRJ)

Type	Tape Width	Diameter	Piece/Reel
LRJ1206	8 mm/embossed plastic	178 mm/7"	5,000
LRJ2512	12 mm/embossed plastic	178 mm/7"	4,000
LRJ2725	12 mm/embossed plastic	178 mm/7"	2,000
LRJ2817	12 mm/embossed plastic	178 mm/7"	1,000
LRJ4527	24 mm/embossed plastic	178 mm/7"	1,000

Derating & Soldering Condition

Derating Curve (LRJ)

Soldering Condition (Reflow Only) (LRJ)

Environmental Characteristics

Environmental Characteristics (LRJ)

Item	Requirement	Test Method
Short Time Overload	$\leq 0.2 \text{ m}\Omega$	JIS C 5201-1 4.13 4 times rated power duration: 5secs.
Load Life	$\leq 0.2 \text{ m}\Omega$	JIS-C5201-1 4.25 70 \pm 2 $^{\circ}\text{C}$, RCWV for 1000 Hrs. with 1.5 Hrs. "ON" and 0.5 Hr. "OFF"
Bias Humidity	$\leq 0.2 \text{ m}\Omega$	JIS-C5201-1 4.24 +85 $^{\circ}\text{C}$ /85%RH for 1,000Hrs. with 1.5Hrs "ON", 0.5Hr "OFF".
High Temperature Exposure (Storage)	$\leq 0.2 \text{ m}\Omega$	JIS-C5201-1 4.23.2 +150 $^{\circ}\text{C}$ for 1000 Hrs.
Solderability	95% Min. coverage	JIS-C5201-1 4.17 245 \pm 5 $^{\circ}\text{C}$ for 3 seconds
Temperature Cycling	$\leq 0.2 \text{ m}\Omega$	JIS-C5201-1 4.19 -55 $^{\circ}\text{C}$ ~ 150 $^{\circ}\text{C}$, 100 cycles

Order Codes

Order Codes (LREA)

LRJ	1206	TR	T	R000

	1206 3.20*1.65		S 5W	
	2512 6.35*3.05		R 3W	
	2817 7.10*4.20		4 4W	
	2725 6.80*6.35		5 5W	
	4527 11.30*6.60			

► General Information

Your Current Options - DeMint Current Sense

As the world becomes more and more technology-driven, the uses for current sensing components will continue to increase. The need for even lower resistance value ranges is already becoming evident, as is the need for these resistors to handle more power. The industry-wide trend is the emergence of smaller and smaller products.

DeMint Electronics offers a wide variety of current sensing products from the industry to military standards, such as current sense in Thin-Film / Thick-Film Technology, Bare Element Resistors, and Open Air Shunts. This enables DeMint to present an astounding number of possible solutions for any circuit design needs.

Applications of Current Detecting Components

DeMint's TCS and CS Series unique form factor provides automotive designers with several advantages. Both TCS and CS Series are ideal for applications involving window lift motors, fuel pump systems, seat belt pretensioners, and pulse width modulator feedback.

The wider resistive element and lower resistance enables higher current to pass through the device. DeMint's LRC ultra low Ohmic metal strip chip series provides the inherent ability to flex slightly and offers stress relief during extreme temperature cycling on typical or metal substrates. This LRC series is suitable for switch power supply applications (DC-DC Converter, Charger, and Adaptor) and power management of monitor.

The open air design of bare element resistor LRA and LRB Series provide a far cooler operation by allowing more air flow under the resistive element to keep excess heat from being transmitted to the PC board. They are suitable for high power AC/DC detection of power supply circuit.

DeMint axial moulded BWL series provides power rating up to 10 watts and lower resistance 0.005Ω, is ideal for all types of current sensing applications including switching and linear power supplies, instruments and power amplifiers.

DeMint standard current sensing components can be replacement for Vishay, IRC, Ohmite, KOA, Yageo devices with fast delivery and more competitive price. Contact us with your specific needs.
